

Meet the Experts on Metastatic Prostate Cancer

23rd
April 2022 (Sat)

Time
3.00pm - 4.30pm

Venue: A zoom link will be provided upon registration

Keynote Speaker

Professor Nicolas Mottet

Professor of Urology, Jean Monnet University Saint-Etienne. France

Professor Nicolas Mottet, MD, PhD is board certified in surgery, urology and medical oncology. He is Professor of Urology, in the Jean Monnet University Saint-Etienne, France. He is chairman of the EAU Working Group on Prostate Cancer Guidelines, and member of the SIOG prostate and bladder cancer guidelines. He has published over 240 peer-reviewed papers, 33 book chapters and made numerous presentations and lectures; he is member of the Editorial Board of the European Urology Journal and of the Egyptian National Cancer Institute (JENCI) journal, and reviewer for many journals. He participated or coordinated more than 40 trials and received several national grants. He sits in the scientific committee of the APCCC since 2017. He is member of the AUA, AFU, ASCO, EAU, ESMO (where he sits in the scientific committee since 2020) and SIOG, senior faculty member of the European school of Oncology.

Professor Dr Ong Teng Aik

Consultant Urologist, University Malaya Medical Centre

Prof Ong is currently the President of the Malaysian Urological Association (MUA) and the Head of Department of Surgery, Faculty of Medicine, University of Malaya, Kuala Lumpur. Prof Ong is actively involved in a number of Asian multi-centre collaborative research activities, including the South East Asia Think Tank Group on Lower Urinary Tract Symptoms and the A-Cap Asia Pacific Prostate Cancer Registry. Together with the clinical oncologists, Prof Ong set up the first Uro-Oncology Combined Clinic in the University of Malaya Medical Centre, Kuala Lumpur, in 2010. The clinic had since been the model of how urologists could work together with the oncologists to improve patient care. Prof Ong's current research focus areas in uro-oncology are prostate epidemiology in Asia, the challenges faced in managing patients with localized prostate cancer in an Asian country, especially in decision making. Development of minimally invasive surgery in Malaysia is also another focus.

Dr Yeoh Wei Sien

Consultant Urologist, University Malaya Medical Centre

Dr Yeoh is currently a board certified urologist working at the University of Malaya Medical Centre. He qualified as a medical doctor in 2005 before embarking on specialty training as a general surgeon in 2009 and went on to serve as a general surgeon in 2014 in Taiping before pursuing sub-specialty training in Urology. Dr Yeoh attained his urology diploma in 2017 and went on to do a fellowship in Melbourne Australia. In his current position, Dr Yeoh actively participates in training of undergraduate, post graduate as well as urology fellows as well as being involved in various clinical trials and studies.

Dr Tan Guan Hee

Consultant Urologist, Sunway Medical Centre

Dr. Tan is currently a urologist in Sunway Medical Centre. He completed the Society of Urologic Oncology fellowship at the University of Toronto. He gained experience from working with leading experts at the Princess Margaret Cancer Centre, Toronto General Hospital, Mount Sinai Hospital and Sunnybrook Health Sciences Centre. He was also trained in robot-assisted surgery for prostate and kidney cancers. Dr. Tan is still actively involved in clinical research and welcomes research collaborations.

Mr Devindran Manoharan

Consultant Urologist, Hospital Pulau Pinang

Devindran Manoharan is a consultant urologist currently practicing in Penang General Hospital. He attended Medical School in Melaka Manipal Medical College where he graduated in 2004 after being awarded the Datuk K. Pathmanathan Gold Medal Prize for Best Student in Medicine. He then served as a house officer and later medical officer in Penang General Hospital before completing his Masters in Surgery in Universiti Malaya in 2014 and was awarded the S.M Al Hady Gold Medal for best overall student in Malaysian Conjoint Board of Surgery Final Examinations. He served as a General Surgeon in Johor Bahru before he joined the urology subspecialty training programme and completed his FRCS in 2019 and was awarded the Gold Medal for best overall candidate. He then completed his fellowship in Uro-Oncology in Adelaide Australia for one year before returning to Penang General Hospital.

Mr Devindran is proficient in endourology and minimally invasive surgery and is dedicated to the pursuit of new technologies and surgical advancement to help serve his patients better. He is active in surgical research and is an investigator in multiple studies conducted in Penang General Hospital. He is keen on education and is involved in training of urology trainees, general surgeons and medical students specifically with Penang Medical College. He is also active in numerous organizations such as the Malaysian Urology association and the Asian Urology association. He is involved in the organization of the Malaysian Urology Conference 2021 and 2022 and is currently part of the Ministry of Health committee involved in the creation of the first national Clinical Practice Guidelines for Erectile Dysfunction.
